

Gastric Surgery

Introduction

There is no independent Gastric Surgery Group at Hospital East. Surgeons in the Upper Abdominal Surgical Oncology Group operate on all patients with gastric cancer.

Routine Activities

Five to six patients are operated on every week. Every Monday from 4:30 to 5:30 p.m., a film

conference on gastrointestinal malignancy is held, at which treatment decisions are discussed, especially for surgical cases, with medical oncologists, endoscopists, radiologists and surgeons present. Operative findings and pathological findings from resected specimens are reported.
